FAQs

What is an Apple ID?

An Apple ID is your user name for everything you do with Apple: Shop the iTunes Store, enable iCloud on all your devices, buy from the Apple Online Store, make a reservation at an Apple Retail Store, access the Apple Support website, and more.

Is there a way to find my Apple ID Name if I can't remember it?

Yes. Visit <http://appleid.apple.com/> and click Find your Apple ID.

How do I change or recover a forgotten Apple ID Password?

If you've forgotten your Apple ID Password or want to change it, go to <http://appleid.apple.com/> and follow the instructions.

I no longer have an email address that was also my Apple ID. Can I still use the email address as my Apple ID?

Apple recommends you change your Apple ID to your current, working email address. This will not create another Apple ID, it will only change it to your working email address.

Why am I sometimes asked to verify my Apple ID by email?

When you create a new Apple ID or make certain changes to your account, Apple will require you to sign in by following the link in a verification email. This is to help protect your identity and keep your account secure.
